Question Number One :

1) Read the text and do the tasks below: (20 points)

The results of a new poll show that financial problems have taken over from the environment as the main concern for young people. The survey asked 12.000 people aged between 14 and 18 what they were most worried about. The clear winner was "finding a job", while the environment was only the seventh greatest worry. This compares with similar polls in the last fifteen years, when environmental worries came first. One of the poll's organizers commented that the results demonstrated a clear change in attitude. " It's not just that getting a job is the main worry," **he** said. "Also included in the top six worries were getting into debt (6th) and passing exams (4th).

I'm convinced that there's a connection. Because of changes in the job market, there is more and more pressure on young people nowadays to pass exams and go on to university in the hope of finding a good job. And rising university fees make it inevitable that many students graduate from university with huge debts. Other concerns mentioned by large numbers of young people also tended to be personal rather than social, including worries about relationships (2nd), health(3rd) and fitting in with peers(4th=)

Annette Coleman, director of the Green Earth organization, said yesterday that she was disappointed, but not surprised, at the fall in the number of young people concerned about the environment. 'It's not that the environmental concerns are less urgent than before – quite the opposite in fact. It's just that after decades of publicity on topics like climate change, so little has actually changed. A lot of people get the feeling that there's nothing we can do about **it**, and young people in particular tend to be impatient. Of course, the other thing is that in times of economic difficulty people are more likely to focus on worries that are more immediate and have an impact on their daily lives.
