**Question Number One:**

**(15 Points)**

**Read the following text about " Money talks" then complete the tasks below:**

1. \_\_\_\_\_  
 In early societies, trade was carried out by bartering: the exchange of one thing or service for another. If one person had a bag of salt and another was good at making shoes, they could agree to exchange the salt for a pair of shoes. But this only worked on two conditions. Firstly, they each had to want what the other person was offering, and secondly, they had to agree that the two things were of equal value.

2. \_\_\_\_\_  
 To solve this problem, people started to base their trade on items that nearly everyone wanted, like salt, chocolate, or cows. It didn't have to be something that they needed, just something desirable. Cowrie shells are a well-known example of this, and a step towards what we recognize as money, because **they** are easier to carry around than cows or bags of salt.

3. \_\_\_\_\_  
 The Lydian, who lived in what is now Turkey, thought to be the first people to use coins, over 2,500 years ago, although pieces of metal had **been used** for centuries before. Other countries soon followed, making their own coins with agreed values. The earliest paper money was probably in common use in China around the year **960**. In this form, money itself doesn't need to be made of something valuable; it is only important because of what it represents or stands for. This is why it is known as representative money.

4. \_\_\_\_\_  
 Nowadays, methods of exchange are moving away from **real** coins and notes that need to be carried around. First, there were cheques, which have now been replaced by plastic credit or debit cards. More recent developments have moved even further in this direction. One example is ' contactless' bracelets that you were on your wrist and pass in front of a machine. Another is the growing popularity of ' bitcoins', a digital currency that can only be used on the internet.
